Delivery specification

Item	Specification
Duration	2 days; 15 instructional hours (9:30am - 5:30pm daily)
Delivery	Instructor-led concepts, demonstrations, discussion and individual/group lab work
Procedure boundary	Slides remain concept-led; detailed procedures are in the Learner Guide and lab folders

Learning outcomes and evidence

Outcome	Evidence
LO1: Support Artificial Intelligence (AI) and Generative AI innovations to champion organisation-wide innovation.	Labs 1, 2 - reviewed against the lab acceptance criteria
LO2: Evaluate and implement GAI technologies for the organisation.	Labs 4, 5 - reviewed against the lab acceptance criteria
LO3: Review and adopt new GAI technologies by reviewing use cases in finance operations.	Labs 7, 9 - reviewed against the lab acceptance criteria
LO4: Review AI ethics and governance in organisation processes for proactive risk monitoring and safety.	Lab 11 - reviewed against the lab acceptance criteria
LO5: Review emerging trends in GAI and strategise cost-control measures to support innovation initiatives.	Labs 9, 11 - reviewed against the lab acceptance criteria

Day 1 • 9:30am – 5:30pm: Generative, Agentic and Agent AI; Copilot in Word and Excel

Time	Min	Facilitation and learner activity	Resource / evidence
09:30–10:00	30	Welcome, course outcomes, lab accounts and the finance data boundary	Lab account sheet
10:00–11:00	60	Topic 1 - Generative, Agentic and Agent AI; finance and fintech use cases	Slides; use-case matrix

11:00–12:00	60	Lab 1 - Compare Generative, Agentic and Agent AI for Finance	Completed comparison matrix
12:00–13:00	60	Lab 2 - Draft a Financial Report with Copilot in Word	Verified financial report
13:00–13:30	30	Lunch	—
13:30–14:30	60	Topic 2 - Copilot in Excel: data readiness, formulas, variance and dashboards	Slides; formula toolkit
14:30–16:00	90	Lab 4 - Prepare Finance Data for Copilot in Excel	Typed, reconciled workbook
16:00–17:30	90	Lab 5 - Analyse Variances and Build a Dashboard with Copilot	Variance dashboard

Trainer emphasis

- Use questions and visuals to surface decision reasoning.
- Demonstrate only the minimum interface needed; direct learners to the detailed procedure.
- Pause at control totals, approvals, privacy and escalation boundaries.
- Confirm evidence against the lab acceptance criteria before moving on.

Day 2 • 9:30am – 5:30pm: SharePoint, Copilot Studio, multi-agent orchestration and AI governance

Time	Min	Facilitation and learner activity	Resource / evidence
09:30–10:15	45	Topic 3 - SharePoint for finance: sites, lists, libraries and grounded agents	Slides; site design pattern
10:15–11:45	90	Lab 7 - Build the Finance SharePoint Site and Load Finance Data	Finance site with loaded data
11:45–12:30	45	Topic 4 - Copilot Studio environments, agent flows and approval gates	Slides; environment map
12:30–13:00	30	Lunch	—
13:00–14:30	90	Lab 9 - Create the Environment and a Finance Agent Flow	Published agent flow
14:30–15:15	45	Topic 5 - Supervisor and connected agents, handoffs and failure modes	Slides; handoff contract
15:15–16:15	60	Lab 11 - Orchestrate a Multi-Agent Month-End Close	Working agent crew
16:15–17:00	45	Topic 6 - AI security, PDPA, data ownership and human oversight	Slides; PDPA checklist
17:00–17:30	30	Course synthesis, governance checklist and next steps	Publish-gate checklist

Trainer emphasis

- Use questions and visuals to surface decision reasoning.
- Demonstrate only the minimum interface needed; direct learners to the detailed procedure.
- Pause at control totals, approvals, privacy and escalation boundaries.
- Confirm evidence against the lab acceptance criteria before moving on.
